

SKILLS

- Python
- Android
- Kotlin
- Jetpack Compose
- MVVM
- Room
- DataStore
- Retrofit
- WorkManager
- Google Play Console
- JavaScript
- TypeScript
- React
- HTML
- CSS
- MySQL
- PHP
- Machine Learning
- Neural Networks
- Git
- GitHub
- Android Studio
- XAMPP
- Arduino
- Blender 3D
- C++
- C#
- Physics

LANGUAGES

- English upper-intermediate
- Polish native
- Spanish elementary

HOBBIES

Software development, artificial intelligence and machine learning, theoretical and applied physics, aviation, sports (cycling, strength training), cooking, travel, computer building.

MICHAŁ MAŁECZEK

- ✉ michalmaleczek@gmail.com
- ☎ 797 108 438
- 📍 Warsaw, Poland
- 📅 13/01/2008

A developer interested in backend development, artificial intelligence, and modern technologies. I have experience creating mobile and web applications, as well as AI-based solutions using Python, Kotlin, React, and TypeScript, among others. I independently design and develop full applications—from architecture and implementation to deployment and maintenance. I eagerly expand my skills by working on my own projects, experimenting with new technologies, and solving real-world programming problems. Selected projects are available on my GitHub profile.

EMPLOYMENT HISTORY

05.2025 – 09.2025

Project Manager - MEVO (mobile application) | XXI High School Hugona Kołłątaja in Warsaw | Madeira, Portugal

- Leading a project team of approximately 30 people, including work coordination, task allocation, and overseeing project delivery
- Responsibility for the concept and architecture of the mobile application as well as the product development direction
- Implementation of a significant part of the application’s technical layer
- Design and development of the application in Kotlin using Jetpack Compose, ViewModel, and Room
- Integration of AI features, including a face recognition module and an offline local language model embedded as an app resource
- Publishing and full configuration of the application on Google Play (account management, deployment, distribution settings)
- Continuous development of the application through updates, new features, and bug fixes
- Ensuring application stability, performance, and ongoing functional improvement

06.2024 – 08.2024

Full-Stack Developer (React & TypeScript) | Red InGo | Warsaw

- Design and implementation of a web application for sales management, performance analytics, and customer service
- Development and integration of APIs and communication between the front end and back-end layers
- Creation of a modern user interface with a strong focus on UI/UX
- Preparation of technical project documentation
- Team collaboration in delivering a complete, functional product to the client

01.2024 – 08.2024

Project Manager – Psychea (mobile application) | Social project as part of “Zwolnieni z Teorii” initiative | Warsaw

- Design and creation of an Android mobile application from scratch using Kotlin

Linkedin:

<https://www.linkedin.com/in/michael-ma%C5%82-eczek-212490266/>

- Implementation of the application architecture using Jetpack Compose, ViewModel, and Room database
- Publishing the first version of the application on Google Play (18.02.2024) and its ongoing development and maintenance
- Continuous improvement of the application in terms of UI/UX and functionality in line with Google best practices
- Coordination of the project team and task allocation
- Preparation of project documentation and reports required by the school and the "Zwolnieni z Teorii" competition
- Establishing cooperation with project partners
- Execution of promotional activities (social media, creation of posts and video materials)
- Regular updates and development of the application, as well as analysis of user needs

06.2021 – 10.2021

Administrator and developer of the website pasjemoje.cal24.pl | Personal project | Warsaw

- Full-stack development of the website (front-end and back-end)
- Design and management of the database
- Implementation and development of platform features
- Content publishing (including original game projects)
- Debugging, optimization, and system maintenance
- SEO optimization and indexing in Google search engine
- Integration of analytics tools and monitoring of user statistics

EDUCATION HISTORY

09.2022 – 04.2026

XXI High School Hugo Kołłątaj in Warsaw | Mathematics, Physics, Computer Science | Secondary education

COURSES

04.2024

Digital Skills | Google

Certified course

04.2024

Project Management Principles | Project Management Institute ATP

Certified course

12.2023

Neural Networks and Deep Learning | Andrew Ng

07.2023

NumPy, Pandas, SciPy Course | W3schools

07.2023

Android basics with Compose | Google

During the Android Basics with Jetpack Compose course, I created several simple applications from scratch that summarized individual modules. These applications utilized Jetpack Compose and the ViewModel, connected to the internet, and stored data in an SQL database.

06.2023

Kotlin Course | W3schools

06.2023

Problem Framing | Google

06.2023

Testing and debugging | Google

06.2023

Data preparation and feature engineering | Google

03.2023

Fast Training in Machine Learning Systems | Google

02.2023

Arduino Course – Level I | FORBOT

11.2022

Introduction to Problem Framing in Machine Learning Systems | Google

ADDITIONAL ACTIVITIES

01.2021 – present

Projects implemented as part of self-development | Warsaw

I implement programming projects as part of my own development, encompassing mobile and web applications, as well as artificial intelligence and backend solutions. These projects focus on the practical use of technologies such as Python, Kotlin, React, and AI tools. Each project encompasses the full software development cycle—from problem analysis, through implementation, to testing and functional development. I encourage you to check out my GitHub profile.

09.2021 – 06.2022

School volunteering | Warsaw
